ANNEX C

Scheme of Inspection and Testing

1. QUALITY ASSURANCE PLAN

1.1 It is expected that during operation of BIS licence manufacturers will implement a Quality Assurance Plan (QAP) i.e. a plan of regular testing and in-process controls, designed to ensure that the product bearing the Standard Mark conforms to all requirements of the Indian Standard.

1.2 The manufacturers shall define a Quality Assurance Plan (QAP) defining the control unit (i.e. lot/batch etc.), the levels of control (i.e. the frequency and number of samples for conducting the different tests as per the Indian Standard) and declare the arrangement for testing i.e. whether in-house or sub-contracting/ sharing for each applicable test and submit the same to BIS Branch Office for information. The manufacturer shall comply with the QAP and maintain test records in accordance with para 2.1.

1.3 Recommended Levels of Control/ Control Unit:

1.3.1 For the guidance of manufacturers in preparing the Quality Assurance Plan, recommended levels of control are given in Table 1. Manufacturer has the discretion of declaring their own levels of control or accept the levels of control given in this document.

1.3.2 The manufacturer shall ensure inspection and testing as per the Quality Assurance Plan submitted by them on the whole production of the factory which is covered by this plan.

1.4 However, all manufacturers shall ensure compliance of their products to all the requirements of the Indian Standard.

2. ENSURING COMPLIANCE THROUGH TESTING

The manufacturers shall ensure compliance of their products to all the requirements of the Indian Standard for which they may have in-house test facilities. However, there is no obligation to maintain in-house laboratory. Licensee may use alternative arrangements for tests of the production as per the declared QAP. Various alternatives are available for operation of BIS certification as given below and the relevant guidelines for availing such relaxations by the manufacturers, as amended from time to time, are to be referred:

- i) Shared testing resources like common facility,
- ii) Cluster based testing facility,
- iii) Sub-contracting to outside laboratories which may either be:
 - a) BIS recognised/ empanelled laboratories, or
 - b) Any accredited laboratory as per ISO/IEC 17025

2.1 Test Records- The manufacturers shall maintain test records for the tests carried out (either in-house or at a sub-contracted or at shared test facility) to establish conformity of the product to the Standard for operation of licence. For the tests being subcontracted or conducted at a shared test facility, test results issued by the laboratories or test facilities, shall be made available for inspection by BIS.

2.1.1 Technical File- Licensee shall maintain a Technical File for each model being manufactured by them. The Technical file shall be submitted to BIS at the time of Grant of Licence/ Inclusion/ Surveillance.

2.1.1.1 The Technical File shall be maintained till the End of Life of the model.

2.1.1.2 Licensee shall declare the frequency for periodic review in Technical file to BIS and record of review to be maintained. In case of any change in the Technical file due to any periodic review/ change in the product, the licensee shall inform the same to BIS at the earliest and provide the copy of the latest version of Technical File to BIS within 30 days of issue of the revised/ modified Technical File.

2.1.1.3 For changes in the product which shall affect the Scope of the Licence, the modified product shall be treated as a different model and separate Technical File shall be maintained for the same.

2.1.1.4 The technical file shall consist of the following documents:

2.1.1.4.1 A general description of the product;

2.1.1.4.2 Product Manual and/ or Instructions for use;

2.1.1.4.3 Instructions for repair/ service for the product/ components, if required;

2.1.1.4.4 Frequency of periodic repair/ service for the product/ components, if required;

2.1.1.4.5 Conceptual product design and manufacturing drawings and, where appropriate, list of components, electrical circuit design, etc. with descriptions and explanations needed for the understanding of these drawings;

2.1.1.4.6 A list of the all Indian/ International standards applied in full or in part during the conformity assessment process with copy of test certificate/ test report;

2.1.1.4.7 Test reports/ Test Certificates and Risk Assessment File for the product and/ or components as per relevant Clauses of the Indian Standard;

2.1.1.4.8 Copies of Conformity Assessment documentation for critical product components;

2.1.1.4.9 Copy of BIS licences for the product/ components, wherever applicable;

2.1.1.4.10A copy of the Declaration of Conformity for other International Standards;

2.1.1.4.11Other documents, if found necessary by the manufacturer and/ or by BIS may also be a part of the Technical File

2.1.2 **Risk Management File-** The licensee shall maintain a Risk Management File for each model in the scope of licence as per the requirement of IS 13450 (Part 2/ Sec 54): 2024/IEC 60601-2-54: 2022. The Risk Management File shall be submitted to BIS at the time of Grant of Licence/Inclusion/Surveillance.

2.1.2.1 The Risk Management File shall be maintained till the End of Life of the model.

2.1.2.2 Licensee shall declare the frequency for periodic review of Risk Management File and record of review in the file to be maintained. In case of any change in the Risk Management File due to any periodic review/ change in the product, the licensee shall inform the same to BIS at the earliest and provide the copy of the latest version of Risk Management File to BIS within 30 days of issue of the revised/ modified Technical File.

3. PACKING AND MARKING

The Standard Mark as given in the Schedule of the licence shall be incorporated legibly and indelibly on each equipment provided always that the product so marked conforms to each requirement of

the specification.

3.1 Packing and Marking shall be done as per Cl. 201.7 & Cl.203.5 of IS 13540 (Part 2 / Sec 54): 2024.

3.2 **Additional Marking requirements:** The equipment shall also be marked with the following additional requirement on the product and its packaging:

a) "For BIS certification details please visit www.bis.gov.in"

4. REJECTION

The production which conforms to the Indian Standard and covered under the scope of this licence shall be marked with the Standard Mark. Disposal of non-conforming product shall be done in such a way so as to ensure that there is no violation of provisions of BIS Act, 2016.
