3. Considering the above, the following grouping guidelines for GoL/CSoL have been developed:
 - a) Precast concrete pipes and collars (as applicable) of any two sizes from each group and each class shall be tested in the factory for all the requirements to cover the complete range of sizes in that class.
 - b) Samples from each type of joint (collar joint/flush jointed/spigot and socket ended) and each manufacturing process (spun cast/vibrated cast) shall be tested as per the above grouping for covering the pipes with the particular type of joint and manufacturing process tested.
4. The Firm shall declare the varieties of pipes they intend to cover in the Licence. The Scope of Licence may be restricted based on the Manufacturing capability and Testing facilities of the Manufacturer
5. During the operation of the Licence, BO shall ensure that all the Varieties covered in the Licence are tested in rotation to the extent possible.
6. Cement Concrete cubes/Mortar cubes shall be cast in the factory during surveillance visits and the quality of concrete/mortar used in manufacturing of pipes shall be assessed through independent testing. Details of mix design may also be obtained from the firm.
