ANNEX -A**Grouping Guidelines**

1. The variety of Countersunk Flat Head Screws (Common Head Style) with Type H or Type Z Cross Recess — Product Grade A - Part 1 Steel Screws of Property Class 4.8 are classified based on the following:

Designation*	Type of Material	Steel
	Property Class	4.8
	Type of Cross Recess	Type – H / Type Z
	Thread	As per table 1 of IS 7485 (Part 1): 2018 / ISO 7046 (Part 1): 2011
	Length (nom.)	To be declared by the manufacturer
Finish	Steel	Electroplating / Any other type of coating to be declared by the manufacturer / As processed

* - For guidance refer example given in Cl. 5 of IS 7485 (Part 1): 2018 / ISO 7046 (Part 1): 2011

2. For considering GoL / CSOL, sample of each designation of Countersunk Flat Head Screws (Common Head Style) with Type H or Type Z Cross Recess —Product Grade A - Part 1 Steel Screws of Property Class 4.8 shall be tested.
3. However, the following relaxations may be considered for GoL/CSOL:
 - i. Sample(s) of lowest thread size and highest thread size of any length of Countersunk Flat Head Screws (Common Head Style) with Type H or Type Z Cross Recess —Product Grade A - Part 1 Steel Screws of Property Class 4.8 is to be tested to cover all the sizes in that particular designation for which firm is having complete manufacturing and testing facilities.
 - ii. Sample of each type of Finish is to be tested.

Note: If coated sample is tested for all requirements, corresponding Countersunk Flat Head Steel Screws (of Property Class 4.8) of same designation with no coating (as processed) surface condition may also be covered.

4. The Scope of License may be restricted based on the Manufacturing and testing capabilities of the manufacturer.
5. During the operation of License, it shall be ensured that all the varieties covered in the License are tested in rotation, to the extent possible

Scheme of Inspection and Testing

1. QUALITY ASSURANCE PLAN

1.1 It is expected that manufacturers (licensees/applicants) will implement a Quality Control Assurance Plan i.e. a plan of regular testing and in-process controls, designed to ensure that the product bearing the Standard Mark conforms to all requirements of the Indian Standard.

1.2 The manufacturers shall define a Quality Control system defining the control unit (i.e. lot/batch etc.) and the levels of control (i.e. the frequency and number of samples for conducting the different tests as per the Indian Standard) and submit the same to BIS Branch Office for information. The manufacturer shall comply with the same and maintain test records in accordance with para 2.5.

1.3 RECOMMENDED LEVELS OF CONTROL/CONTROL UNIT:

1.3.1 For the guidance of manufacturers, the recommended definition of control unit is: *Countersunk Flat Head Steel Screws (of Property Class 4.8) of same designation and type of finish manufactured in a day under similar process condition from the same consignment of raw materials* shall constitute a control unit.

1.3.2 As mentioned above, recommended levels of control are given in **Table 1 for guidance only**.

1.3.3 The tests as indicated in Table 1 and at the levels of control in column 3 of Table 1 or the Quality Assurance Plan as submitted by the manufacturer to BIS may be carried out on the whole production of the factory which is covered by this plan and records maintained in accordance with para 2.5.

1.4 However, all manufacturers shall ensure compliance of their products to all the requirements of the Indian Standard.

2. ENSURING COMPLIANCE THROUGH TESTING- It is expected that manufacturers (licensees/applicants) will establish a suitably equipped and staffed in house laboratory (In house testing facility) for testing at least those parameters of the Indian Standard which require routine testing for ensuring quality of the product. This includes in-process controls as may be defined and put in place by the manufacturer and testing parameters/requirements which can only be performed in the factory.

2.1 For the guidance of manufacturers, Table 1 giving the recommended levels of control is given below. Column 2 of Table 1 indicates where test equipment is required in house i.e “R” or whether it can be subcontracted as “S”. Subcontracting is permitted to BIS recognized/empanelled laboratory or any other laboratory having valid accreditation as per IS/ISO/IEC 17025, test reports issued by the laboratories shall be available for inspection by BIS.

2.2 For MSME manufacturers, the requirement of maintaining a laboratory/in-house testing facility is optional.

2.2.1 MSME manufacturers may utilize common cluster based facilities as per guidelines for the utilization of cluster based test facilities by MSMEs or the provisions of Sharing of testing facilities or get testing done from BIS recognized/empaneled laboratory or any other laboratory having valid NABL accreditation as per IS/ISO/IEC 17025.

2.3 Large Scale manufacturers (including foreign manufacturers) shall maintain an in-house laboratory, which shall be suitably equipped (as given in column 2 of Table 1) and staffed, where different tests given in the specification shall be carried out in accordance with the method given in the specification. They shall also implement

a calibration plan for the test equipment.

2.3.1 Alternatively, in lieu of an in-house laboratory, these manufacturers can also utilize the provisions of Sharing of testing facilities as per the Annexure-X (Relaxation in test facilities) of the guidelines for Grant of Licence available on BIS website www.bis.gov.in. (Under Conformity Assessment>Product Certification Process)

2.4 TEST RECORDS- The manufacturers maintaining an in-house laboratory or utilizing common cluster based facilities or shared test facilities shall maintain test records for the tests carried out to establish conformity. For the tests being subcontracted to BIS recognized/empanelled laboratory or any other laboratory having valid accreditation as per IS/ISO/IEC 17025, test reports issued by the laboratories shall be available for inspection by BIS.

3. PACKING AND MARKING - The Standard Mark as given in the Schedule of the licence shall be marked legibly and indelibly on the packaging of Countersunk Flat Head Steel Screws (of Property Class 4.8) provided always that the screws so marked conforms to each requirement of the specification.

3.1 Marking on the packaging of Countersunk Flat Head Steel Screws (of Property Class 4.8) shall be done as per Cl. 5 of IS 7485 (Part 1): 2018 / ISO 7046 (Part 1): 2011.

3.2 **Additional Marking requirements:** The following additional requirement shall also be marked on the packaging of the Countersunk Flat Head Steel Screws (of Property Class 4.8):

a) “For BIS certification details please visit www.bis.gov.in”

3.3 All the production which conforms to the Indian Standard and covered under the scope of this licence shall be marked with the Standard Mark.

4. HYGIENIC CONDITIONS (if applicable) – NA.

5. REJECTION - Disposal of non-conforming product shall be done in such a way so as to ensure that there is no violation of provisions of BIS Act,2016.
