Grouping Guidelines

1. Rolling Bearings – Part 1: Steel Balls as per IS 2898 (Part 1): 2026 may be classified as below:

Ball Grade (<i>in the descending order of stringency</i>)	G3/ G5/ G10/ G16/ G20/ G24/ G28/ G40/ G60/ G100/ G200
Nominal Ball Diameter	As per Table 1 of IS 2898 (Part 1): 2026 (preferred)

2. Based on the above classification, following grouping guidelines shall be followed for considering Grant of Licence (GoL)/Change in Scope of Licence (CSoL):
- Sample of Rolling Bearings – Steel Balls with the most stringent ball grade shall be tested to cover Rolling Bearings – Steel Balls with lesser stringent ball grades upto and including the tested ball grade.

For example, if a sample of Rolling Bearings – Steel Balls with ball grade G10 is drawn and tested, Rolling Bearing Steel Balls with ball grades G16, G20, G24, G28, G40, G60, G100 and G200 shall also be included in the scope.
 - One sample each of Rolling Bearing Steel Balls with the lowest nominal ball diameter and the highest nominal ball diameter shall be tested to cover all the nominal ball diameters.
3. The Firm shall declare the varieties of Rolling Bearing Steel Balls intended to be covered in the Licence. The Scope of Licence may be restricted based on the Manufacturing and testing capabilities of the Manufacturer.
4. During the operation of the Licence, BO shall ensure that all the varieties covered in the Licence are tested in rotation, to the extent possible.

ANNEX C

Scheme of Inspection and Testing

1. QUALITY ASSURANCE PLAN

- 1.1 It is expected that during operation of BIS licence manufacturers will implement a Quality Assurance Plan (QAP) i.e. a plan of regular testing and in-process controls, designed to ensure that the product bearing the Standard Mark conforms to all requirements of the Indian Standard.
- 1.2 The manufacturers shall define a Quality Assurance Plan (QAP) defining the control unit (i.e. lot/batch etc.), the levels of control (i.e. the frequency and number of samples for conducting the different tests as per the Indian Standard) and declare the arrangement for testing i.e. whether in-house or sub-contracting/ sharing for each applicable test and submit the same to BIS Branch Office for information. The manufacturer shall comply with the QAP and maintain test records in accordance with para 2.1.
- 1.3 Recommended Levels of Control/ Control Unit:**
- 1.3.1 For the guidance of manufacturers, the recommended definition of control unit is: *entire quantity of Rolling Bearings – Steel Balls of same ball grade and nominal ball diameter, manufactured in a day under similar process condition from the same grade of raw materials* shall constitute a control unit.
- 1.3.2 For the guidance of manufacturers in preparing the Quality Assurance Plan, recommended levels of control are given in Table 1. Manufacturer has the discretion of declaring their own levels of control or accept the levels of control given in this document.
- 1.3.3 The manufacturer shall ensure inspection and testing as per the Quality Assurance Plan submitted by them on the whole production of the factory which is covered by this plan.
- 1.4 However, all manufacturers shall ensure compliance of their products to all the requirements of the Indian Standard.

2. ENSURING COMPLIANCE THROUGH TESTING

The manufacturers shall ensure compliance of their products to all the requirements of the Indian Standard for which they may have in-house test facilities. However, there is no obligation to maintain in-house laboratory. Licensee may use alternative arrangements for tests of the production as per the declared QAP. Various alternatives are available for operation of BIS certification as given below and the relevant guidelines for availing such relaxations by the manufacturers, as amended from time to time, are to be referred:

- i) Shared testing resources like common facility,
- ii) Cluster based testing facility,
- iii) Sub-contracting to outside laboratories which may either be:
 - a) BIS recognised/ empanelled laboratories, or
 - b) Any accredited laboratory as per ISO/IEC 17025

2.1 Test Records- The manufacturers shall maintain test records for the tests carried out (either in-house or at a sub-contracted or at shared test facility) to establish conformity of the product to the Standard for operation of licence. For the tests being subcontracted or conducted at a shared test facility, test results issued by the laboratories or test facilities, shall be made available for inspection by BIS.

3. PACKING AND MARKING

The Standard Mark as given in the Schedule of the licence shall be incorporated legibly and indelibly on the packaging of the Rolling Bearings – Steel Balls provided always that the Rolling Bearings – Steel Balls so marked conforms to each requirement of the specification.

3.1 Additional Marking requirements: The Rolling Bearing – Steel Balls shall also be marked with the following additional requirement on its packaging:

- a) “For BIS certification details please visit www.bis.gov.in”

4. REJECTION

The production which conforms to the Indian Standard and covered under the scope of this licence shall be marked with the Standard Mark. Disposal of non-conforming product shall be done in such a way so as to ensure that there is no violation of provisions of BIS Act, 2016.
